

Puppy Maxi

FOR LARGE-BREED PUPPIES

SATISFACTION PUPPY MAXI is specially formulated for puppies (from 1 to 24 months) of large breeds (over 25 kg at adult weight). With a high content of fresh chicken and rice, ingredients that are highly digestible and appetising, it is the ideal food for a healthy diet. Its moderate energy density and easily digestible proteins provide the ideal rate of growth for larger breeds. High-energy diets can affect musculoskeletal development in large-breeds puppies by causing excessively rapid growth.

Benefits

-It is very important that dogs grow without any excess weight to avoid potential obesity in the future. The L-Carnitine helps to convert fat into energy, avoiding any potential build-up of fat.

-The high protein and energy content is essential for the faster growth rate of small breeds, which reach adult size in just 6 months.

- The Yucca extract significantly reduces the smell of the dog's faeces.

- Combined, Glucosamine and Chondroitin sulphate help to protect joints by regenerating cartilage and preventing wear.

-The Bioflavonoids, cellular antioxidants (vitamins C and E) that come from citrus fruits, encourage the development of a strong and healthy immune system.

Ingredients

Dehydrated poultry proteins, fresh chicken (20%), rice (20%), brown rice, corn gluten, poultry fat, beet pulp, brewer's yeast, hydrolysed animal proteins, sunflower oil, mineral substances, citrus extracts source of bioflavonoids (0.15%), glucosamine hydrochloride (450 mg/kg), chondroitin sulphate (340 mg/kg).

Average analysis

Protein: 28%, Fat content: 18%, Crude fibres: 1.8% Inorganic matter: 6%.
