

# Addiction Puppies

---

Complete food specially formulated for puppies in their first stages of growth and development, as well as expectant and nursing mothers.

The hugely appetising and digestible nature of this food makes it the perfect diet for **puppies in their first stage of growth and development, as well expectant and nursing mothers**. It is specially formulated for puppies from their 1<sup>st</sup> month to their 12th month of life. It guarantees optimum bone, teeth and muscle development. The size and shape of the pellets has been specially designed for puppy consumption. This product has been manufactured using carefully selected raw materials and taking great care in its preparation and packing.

## Benefits

❖ A balanced supply of calcium and phosphorus assures an optimum development of the skeleton in the stage of growth.

❖ Additional contribution of vitamin complex of Vitamin E that improves performance, strength and vitality for the heart and prevents the formation of blood clots.

❖ Important contribution of protein and energy which is needed due to the high rate of growth of the small breeds that in only 6 months reach adulthood.

❖ Suitable balance between proteins and fat according to an estimated consumption of the dog. Proteins and fat of high digestibility that reduce the portion of the amount the dog consumes.

❖ Vitamin complex that strengthens the immune system.
