A RESPONSIBLE DIET FOR HEALTHY PETS

MAINTENANCE SMALL BREEDS

FOR SMALL DOG BREEDS

As small dog breeds live for a long time, it is important to take special care of their food throughout their lives by providing them with the required energy for their intense activity and to prevent potential obesity. The small size of the biscuits is ideal for the jaws and palates of these dog breeds.

Chicken fat is the main source of energy. This fat provides a large quantity of linoleic acid that promotes healthy skin and a radiant coat. It is highly digestible so it is completely assimilated by the intestine. It provides an appealing taste and appropriate texture to the food.
